

Dimitris Palamidas

palamidas.dim@gmail.com / +30 6978916927 / Athens, Greece

Summary

Full Stack & AI Engineer specializing in production-ready Intelligent Document Processing. I architect high-scale **Vision-to-Data** pipelines that transform massive, unstructured datasets into structured digital assets. My focus is on orchestrating **AI services (Vertex AI, Gemini)** through robust **Python backends (FastAPI)** and bridging them with modern enterprise frontends (**React, Next.js**) to automate complex agentic workflows.

Skills

Large Language Models(LLM), RAG Systems, Vertex AI, Prompt Engineering, Python, React, Next.js, Angular, Supabase, SQL Server, Docker, GitHub

Work Experience

Full Stack & AI Engineer

CloudFin • Athens , Greece

12/2025 - Present

- **Architected high-scale Vision-to-Data pipelines** using Vertex AI to automate metadata extraction from millions of document scans.
- **Implemented domain-specific LLM Fine-tuning** for document classification and structural boundary detection.
- **Engineered asynchronous batch processing systems** with Python, FastAPI, and Celery/Redis to orchestrate heavy AI workloads.
- **Developed Human-in-the-Loop (HITL) workflows** in React for multi-tier validation, ensuring 100% data integrity.

Front End Developer

CloudFin • Athens , Greece

11/2024 - 12/2025

- **Developed enterprise Angular applications** using Telerik Kendo UI components for financial management systems serving B2B clients across logistics, manufacturing, and public sector
- **Built responsive UI features** including Purchase Order automation, Invoice Processing workflows, and Document Management modules with complex data grids and form validation
- **Implemented solutions for production issues** including grid sorting, pagination, and filtering using Angular Signals and RxJS for efficient state management
- **Integrated RESTful APIs** and collaborated with backend developers, designers, and AI engineers in Agile environment to deliver production-ready features

Full Stack Developer

Self-employed

11/2023 - Present

- **Architected Qbonet (SaaS):** Developed an AI-driven platform for infrastructure budgeting using **Agentic Workflows** and **RAG** to automate cost estimations from complex industrial datasets.
- **Developed Full-Stack E-commerce Solutions:** Built high-performance platforms using **Next.js** and **Supabase**, featuring custom admin panels, **Viva Wallet** integration, and automated logistics via **Box Now API**.
- **Built Real-time Marketplaces:** Engineered a vehicle marketplace with advanced search functionality, real-time inventory management, and automated international inquiry systems.

- **End-to-End Deployment:** Managed the full software development lifecycle (SDLC), deploying production-ready applications on **Vercel** with a focus on **modern UI/UX** and responsive design.
-

Education

Computer Software

Coding Factory, Athens University of Economics and Business
10/2023

- Received a *Vocational Education and Training Certificate* on a 7-month boot camp.

Merchant Marine

Merchant Marine Academy of Aspropyrgos
10/2019

- Received a *Merchant Marine Officer Degree* – (Bachelor)
-
